Summary

A Full Stack Developer with a proven ability to build and deploy dynamic, responsive web applications from end to end. Skilled in modern frameworks, with solid expertise in UI/UX implementation, database management, and server deployment. Successfully developed and delivered impactful projects such as Gupteshwor Club, Expense Tracker, Dern Support, Personal Portfolio, and more. Driven by a passion for creating intuitive user experiences, continuous learning, and contributing to collaborative, growth-focused environments.

Skills

Frontend
Languages: JavaScript, TypeScript
Frameworks & Libraries: React, Next.js
UI & Animation: Tailwind CSS, Framer Motion, GSAP
State Management: Redux Toolkit, zustand
Data Fetching & Caching: RTK Query, TanStack Query, Axios

Backend
Frameworks: Node.js, Express.js, NestJS
Databases: PostgreSQL, MongoDB
ORM / ODM: Prisma, Mongoose
Authentication & Security: JWT, Bcrypt, crypto
Email & Notifications: SMTP, Nodemailer
API Design: RESTful APIs

DevOps & Tools

Server Deployment: Docker, CI/CD
Project Management: Jira (Agile Methodology)
Version Control: GitHub, GitLab

Associate Software Develope

Novelty lab | July 2025 - current (5 months)

Projects:

Orientation Hub

- Developing a payment tracking and management system for orientation companies that handle students going abroad through agents.
- Enables companies to track agents, students, and payment records efficiently from a centralized dashboard.
- Created pagination and dynamic filtering, sorting.
- Developed reusable code for searching, sorting, and paginations.
- Building a monorepo architecture integrating React (frontend) and NestJS (backend) for seamless development and deployment.
- Ensuring structured and scalable data management using PostgreSQL and Prisma ORM.
- Designing a responsive, user-friendly UI with Shadcn UI, and optimizing data fetching and routing using TanStack Query and TanStack Router.

Gupteshwor Club

- Developed an online News Portal system for managing and publishing news and research content.
- Integrated SSR (Server-Side Rendering) for dynamic pages and improved SEO.
- Created pagination and dynamic filtering, sorting.
- Developed reusable code for searching, sorting, and paginations.

- Designed a User Management System to assign tasks and manage roles effectively.
- Created APIs using Next JS , including authentication and authorization.
- Implemented email verification for secure user onboarding.
- Automated and periodic email sending for follow-ups and checkups
- Developed the frontend using Next.js with GSAP animations for smooth transitions and engaging user interactions.

RK Consultant Service

- Developed a static website for RK Consultant, showcasing their expertise in accounting, auditing, consulting, and training.
- User Friendly and responsive UI.
- Appointment booking using Calendly.

Personal Projects

Expense Tracker

- Budget Tracker simplifies managing finances by letting users track income, expenses and yearly trends
- Listing signup and verification process with Clerk Authentication
- Real-time data fetching and synchronization with API using Tan-Stack Query
- clean and user-friendly UI optimized for all devices
- Set and update budgets to monitor financial goals

Dern Support

- Web app that allows users to easily book computer repair services and consult with specialists for troubleshooting and advice.
- Enabled admins to add and manage spare parts, while users can view checkout details and bills with corresponding spare part costs.

- Integrated SMTP email service to send notifications and handle user queries efficiently.
- Role based auth for admin and normal user with JWT tokens
- Developed reusable code for searching, sorting, and paginations
- Created APIs using Express.js, including authentication and authorization, and integrated them into a React application.

Personal Portfolio

- Developed a personal portfolio website showcasing projects and skills.
- Implemented full CRUD operations for dynamic content management.
- Built the frontend using Next.js and the backend using Express.js.
- Designed a smooth, interactive UI with Framer Motion for seamless animations.
- Ensured a responsive and optimized user experience across all devices.

Job Finder

- Simple Web app that allows users to manage job postings, apply for jobs and save their favorite listings.
- Added pagination for efficient job browsing and data handling.
- Implemented ISR (Incremental Static Regeneration) to update static pages efficiently without full redeployment.
- Added pagination for efficient job browsing and data handling.

Education

- Kingsway Academy | **BTECH Diploma** (Pearson) - 2024
- Universal College | **Bachelor's of Business Administration** (TU) **-** 2023
- Premier College | **+2 in Computer Science** - 2018

Hobbies - Reading, Playing Music, Travelling
